1. n Account Unit is the interface between the _____ and the _____.

- A. Users, Domain
- B. Gateway, Resources
- C. System, Database
- D. Clients, Server

Answer: D

2. Where multiple Smart Directory servers exist in an organization, a query from one of the clients for user information is made to the servers based on a priority. By what category can this priority be defined?

- A. Gateway or Domain
- B. Location or Account Unit
- C. Location or Domain
- D. Gateway or Account Unit

Answer: D

3. An organization may be distributed across several Smart Directory (LDAP) servers. What provision do you make to enable a Gateway to use all available resources? Each Smart Directory (LDAP) server must be:

- A. a member in the LDAP group.
- B. a member in a group that is associated with one Account Unit.
- C. represented by a separate Account Unit.
- D. represented by a separate Account Unit that is a member in the LDAP group.

Answer: C

4. In a zero downtime firewall cluster environment what command do you run to avoid switching problems around the cluster.

- A. cphaconf set mc_reload
- B. cphaconf set clear_subs
- C. cphaconf set_ccp broadcast
- D. cphaconf set_ccp multicast

Answer: C

5. Which is NOT a method through which Identity Awareness receives its identities?

- A. GPO
- B. Captive Portal
- C. AD Query
- D. Identity Agent

Answer: A

6. A Zero Downtime Upgrade of a cluster:

- A. Upgrades all cluster members except one at the same time.
- B. Is only supported in major releases (R70 to R71, R71 to R76).
- C. Treats each individual cluster member as an individual gateway.
- D. Is not a valid upgrade method in R76.

Answer: A

7. The set of rules that governs the types of objects in the directory and their associated attributes is called the:

- A. LDAP Policy
- B. Schema
- C. Access Control List
- D. Smart Database

Answer: B

8. What firewall kernel table stores information about port allocations for Hide NAT connections?

- A. NAT_dst_any_list
- B. host_ip_addrs
- C. NAT_src_any_list
- D. fw_alloc

Answer: D

9. Check Point support has asked Tony for a firewall capture of accepted packets. What would be the correct syntax to create a capture file to a filename called monitor.out?

- A. Run fw monitor -e "accept;" -f monitor.out
- B. Run fw monitor -e "accept;" -c monitor.out
- C. Run fw monitor -e "accept;" -o monitor.out
- D. Run fw monitor -e "accept;" -m monitor.out

Answer: C

10. With the User Directory Software Blade, you can create R76 user definitions on a(n) _____ Server.

- A. SecureID
- B. LDAP
- C. NT Domain
- D. Radius

Answer: B

11. If no flags are defined during a back up on the Security Management Server, where does the system store the *.tgz file?

- A. /var/opt/backups
- B. /var/backups
- C. /var/CPbackup/backups
- D. /var/tmp/backups

Answer: C

12. If Bob wanted to create a Management High Availability configuration, what is the minimum number of Security Management servers required in order to achieve his goal?

- A. Three
- B. Two
- C. Four

D. One

Answer: D

13. Typically, when you upgrade the Security Management Server, you install and configure a fresh R76 installation on a new computer and then migrate the database from the original machine. When doing this, what is required of the two machines? They must both have the same:

A. Products installed.

B. Interfaces configured.

C. State.

D. Patch level.

Answer: A

14. Where do you define NAT properties so that NAT is performed either client side or server side?

A. In Smart Dashboard under Gateway setting

B. In Smart Dashboard under Global Properties > NAT definition

C. In Smart Dashboard in the NAT Rules

D. In file \$DFWDIR/lib/table.def

Answer: B

15. A Fast Path Upgrade of a cluster:

A. Upgrades all cluster members except one at the same time.

B. Treats each individual cluster member as an individual gateway.

C. Is not a valid upgrade method in R76.

D. Is only supported in major releases (R70 to R71, R75 to R76).

Answer: C

16. The process _____ is responsible for all other security server processes run on the Gateway.

A. FWD

B. CPLMD

C. FWM

D. CPD

Answer: A

17. Your organization's disaster recovery plan needs an update to the backup and restore section to reap the benefits of the new distributed R76 installation. Your plan must meet the following required and desired objectives: Upon evaluation, your plan:

Required Objective: The Security Policy repository must be backed up no less frequently than every 24 hours.

Desired Objective: The R76 components that enforce the Security Policies should be backed up at least once a week.

Desired Objective: Back up R76 logs at least once a week.

Your disaster recovery plan is as follows:

- Use the utility `cron` to run the command `upgrade_export` each night on the Security Management Servers.
- Configure the organization's routine back up software to back up the files created by the command `upgrade_export`.
- Configure the SecurePlatform back up utility to back up the Security Gateways every Saturday night.
- Use the utility `cron` to run the command `upgrade_export` each Saturday night on the log servers.
- Configure an automatic, nightly `logswitch`.
- Configure the organization's routine back up software to back up the switched logs every night.

A. Meets the required objective and only one desired objective

B. Meets the required objective and both desired objectives

C. Meets the required objective but does not meet either desired objective

D. Does not meet the required objective

Answer: B

18. When, during policy installation, does the atomic load task run?

A. It is the first task during policy installation.

B. It is the last task during policy installation.

C. Before CPD runs on the Gateway.

D. Immediately after fwm load runs on the Smart Center.

Answer: B

19. Where do you verify that Smart Directory is enabled?

A. Global properties > Authentication > Use Smart Directory (LDAP) for Security Gateways is checked

B. Gateway properties > Smart Directory (LDAP) > Use Smart Directory (LDAP) for Security Gateways is checked

C. Gateway properties > Authentication > Use Smart Directory (LDAP) for Security Gateways is checked

D. Global properties > Smart Directory (LDAP) > Use Smart Directory (LDAP) for Security Gateways is checked

Answer: D

20. What process is responsible for transferring the policy file from Smart Center to the Gateway?

A. FWD

B. FWM

C. CPRID

D. CPD

Answer: D

Thank You for Trying Our Product

* 100% Pass or Money Back

All our products come with a 90-day Money Back Guarantee.

* One year free update

You can enjoy free update one year. 24x7 online support.

* Trusted by Millions

We currently serve more than 30,000,000 customers.

* Shop Securely

All transactions are protected by VeriSign!
