1. When a PC computer device wants to communicate with the processor, which system resource does it use?

- A. I/O
- B. DMA
- C. PIO
- D. IRQ

Answer: D

2. Server-based networks typically contain centralized network resources, which are usually not available on peer-to-peer (P2P) networks. Which of the following examples describes a server based network?

- A. Three network clients connecting to a file server
- B. Downloading a file by using BitTorrent technology
- C. Sharing one or more files to another computer via the Internet
- D. A client connecting to another computer over the Internet to share music

Answer: A

3. On your Windows laptop, you store all your vacation photos and your entire digital music library. Concerned about data loss, you perform frequent backups. Your laptop has recently been stolen and you need to restore your files to a desktop computer. Which Windows tool would you use to recover and set up the saved copies of your files onto your desktop computer?

- A. Backup and Restore
- B. Backup Recovery
- C. System Recovery
- D. System Restore

Answer: A

4. Acme Corp. is a small manufacturing company. To reduce IT infrastructure costs, it uses cloudbased services extensively and strives to have the least amount of IT equipment onsite. Last year, Acme suffered a failure that resulted in significant down time and data loss. Management has decided to implement a continuous data protection (CDP) solution. Which type of CDP solution best fits Acme's situation?

- A. Cloud-only solution
- B. Local systems solution

- C. Distributed network services provider
- D. Contracted network services provider

Answer: A

5. You have just been hired by a large company, and the IT manager is giving you an overview of the corporate network. He tells you that the corporation is spread out over several cities, and various departments are divided into subnetworks that are connected using routers. What type of network are you being shown?

- A. Local area network (LAN)
- B. Wide area network (WAN)
- C. Virtual private network (VPN)
- D. Internet Exchange Point (IPX)

Answer: B

6. Patrick visits his teenage daughter's social media page and discovers several offensive posts about one of her classmates. After speaking with his daughter, Patrick learns that several other girls in her class are upset with the classmate and have been posting, texting and e-mailing others about the girl. What is the best way for Patrick to help his daughter understand cyber bullying?

- A. He should advise his daughter to ignore the posts, texts and c-mails.
- B. He should explain to his daughter that she is participating in the bullying by accepting others' posts, texts and c-mails.
- C. He should explain to his daughter that the Internet embraces freedom of speech, and anyone is allowed to write anything.
- D. He should advise his daughter to delete all the posts, texts and c-mails she has received, as well as any new ones that appear.

Answer: B

7. Which of the following is a disadvantage of implementing a Bring Your Own Device (BYOD) policy in a company?

- A. Increased cost for licensing mobile applications
- B. Configuring the corporate e-mail server to work with mobile devices
- C. Inability to control access to company data if the device is stolen or lost
- D. Providing training for employees on how to use mobile devices with company applications

Answer: C

8. Selena has decided to change a 32-character unique wireless network name on her wireless router to improve network security after a break-in. She is following advice from CERT to make this change in order to avoid attacks from botnets. Which of the following settings would she modify?

- A. Direct Sequence Spread Spectrum (DSSS) signal
- B. Media Access Control (MAC) address
- C. Wi-Fi Protected Access 2 (WPA2)
- D. Service Set Identifier (SSID)

Answer: D
