

1Y0-371 - Designing, Deploying and Managing Citrix XenMobile 10 Enterprise Solutions

<http://www.certleader.com/1Y0-371-dumps.html>

1. Scenario: A Citrix Engineer needs to deploy a XenMobile solution for a large organization. The organization will use XenMobile to manage Android and iOS devices.

To provide resilience, NetScaler appliances will communicate with XenMobile Servers. The engineer has deployed all necessary infrastructure and opened the required firewall ports. To load balance mobile device management traffic, the engineer has configured NetScaler to use SSL_Bridge to communicate with a XenMobile Server cluster.

Which persistence method should the engineer configure to facilitate consistent communication between the NetScaler and the XenMobile Servers?

- A. SSLSESSION
- B. CUSTOMSERVERID
- C. DESTIP
- D. COOKIEINSERT

Answer: A

2. A Citrix Engineer must deploy a scheduling policy to _____ and _____ devices in order to allow these devices to check in automatically without further intervention by the engineer. (Choose the two correct options to complete the sentence.)

- A. iOS
- B. Android
- C. Windows Phone 8.1
- D. Symbian

Answer: B,D

3. A Citrix Engineer needs to allow junior administrators to perform selective wipe requests

from a single console for users who are members of the IT and HR departments. What should the engineer do to accomplish this objective?

- A. Use two XenMobile instances, one for IT and HR users, and another instance for all other users.
- B. Use XenMobile Role-based Access Control (RBAC) to delegate the selective wipe permission to the junior administrative team, only targeting users in the IT and HR departments.
- C. Use XenMobile deployment rules to assign the selective wipe task to the junior administrative team and only target the IT and HR users.
- D. Create XenMobile Delivery Groups to assign the selective wipe option to the junior administrative team for the IT and HR users.

Answer: B

4. Which two types of certificates will require a restart when uploaded to a XenMobile Server using the XenMobile Console? (Choose two.)

- A. SSL Listener
- B. Root
- C. Apple Push Notification service (APNs)
- D. Intermediate
- E. Device Certificate Authority (CA)

Answer: A,C

5. Which two components are required in order for a Citrix Engineer to use the MDX Toolkit to wrap Android applications for production use? (Choose two.)

- A. Command-line tools
- B. Enterprise certificate from Symantec
- C. Android Developer Tools and Android SDK
- D. Android Just-in-Time Compiler
- E. A keystore certificate

Answer: C,E

6. Scenario: A customer would like to configure a single NetScaler Gateway that facilitates access to XenMobile and XenApp/XenDesktop resources from iOS and Android mobile devices. The customer also plans for users to access XenApp and XenDesktop resources by using a web browser from other endpoints.

The following Session Policies and expressions have been configured on NetScaler:

- Policy 1: REQ.HTTP.HEADER User-Agent NOTCONTAINS CitrixReceiver && REQ.HTTP.HEADER Referer EXISTS
- Policy 2: REQ.HTTP.HEADER User-Agent CONTAINS CitrixReceiver && REQ.HTTP.HEADER X-Citrix-Gateway EXISTS

A Citrix Engineer is asked to create a new Session Profile for users accessing resources through web browsers on their endpoint devices.

The profile should be bound to _____ and direct users to _____. (Choose the correct set of options to complete the sentence.)

- A. Policy 1; the XenMobile Server
- B. Policy 1; StoreFront
- C. Policy 2; the XenMobile Server
- D. Policy 2; StoreFront

Answer: B

7. Scenario: A Citrix Engineer is designing a XenMobile Enterprise solution to support approximately 30,000 device connections. The environment must be able to sustain the failure of one node in a cluster at any given time for redundancy and maintenance purposes. Each server's specifications include four vCPUs and 16 GB of RAM.

What is the minimum number of XenMobile Servers that the engineer should recommend as part of this cluster?

- A. Two
- B. Three
- C. Four
- D. Five

Answer: C

8. A Citrix Engineer needs to design a multi-node, scalable XenMobile solution.

Which database type should the engineer choose to meet the needs of this deployment?

- A. Microsoft SQL
- B. PostgreSQL
- C. Oracle
- D. MySQL

Answer: A

9. Which XenMobile deployment option would pose the greatest security risk?

- A. SSL Bridge at the NetScaler load balancing tier with the XenMobile Server in the Demilitarized Zone (DMZ).
- B. SSL Bridge at the NetScaler load balancing tier with the XenMobile Server on the internal network segment.

C. SSL Offload at the NetScaler load balancing tier with the XenMobile Server in the Demilitarized Zone (DMZ).

D. SSL Offload at the NetScaler load balancing tier with the XenMobile Server on the internal network segment.

Answer: B

10. Scenario: A Citrix Engineer needs to implement SSL Offload in which traffic is encrypted all the way from the client device to the XenMobile Server. The vServer and service configurations are listed below.

Load balancing vServers:

- Protocol: SSL, Port: 443
- Protocol: SSL, Port: 8443

Services:

- Protocol: SSL, Port: 443 (Bound to 443 vServer)
- Protocol: SSL, Port: 8443 (Bound to 8443 vServer) The current configuration is NOT working properly.

What should the engineer adjust to implement SSL Offload successfully?

- A. Bind Port 80 services to both the 443 and 8443 load-balancing vServers but make no other changes.
- B. Bind the port 8443 service to the port 443 vServer; the port 443 service is NOT needed.
- C. Bind the port 443 service to the port 8443 vServer; the port 8443 service is NOT needed.
- D. Bind Port 80 services to both the 443 and 8443 load-balancing vServers and open port 80 on the XenMobile Server IP Tables firewall.

Answer: B

Thank You for Trying Our Product

* 100% Pass or Money Back

All our products come with a 90-day Money Back Guarantee.

* One year free update

You can enjoy free update one year. 24x7 online support.

* Trusted by Millions

We currently serve more than 30,000,000 customers.

* Shop Securely

All transactions are protected by VeriSign!

100% Pass Your 1Y0-371 Exam with Our Prep Materials Via below:
