

300-365 - WIDEPLOY Deploying Cisco Wireless Enterprise Networks

<http://www.certleader.com/300-365-dumps.html>

1. What are two functions of the RAP in a mesh network? (Choose two.)

- A. It provides a wired connection for the wireless mesh APs.
- B. It adds capacity and resilience to a mesh area.
- C. it creates a centralized management location for the mesh network.
- D. it reduces the hop count to the wireless network that is connected to the edge.
- E. it routes traffic from the wireless mesh to the wired network.

Answer: B,D

2. A customer has limited staff to manage a wireless network. The customer wants a solution that requires minimum hardware. Which type of architecture do you propose?

- A. centralized
- B. distributed
- C. cloud-based
- D. unified

Answer: A

3. A customer called into the support center with a problem ticket that involves wireless clients having to reauthenticate when they are walking around their office. After further investigation, it was discovered that the customer has two controllers in an N+1 deployment. Which action must the engineer take to troubleshoot the issue?

- A. Verify that the wireless controllers are in the same mobility group and that the access points are all on the primary controller.
- B. Under the SSID, make sure that 802.1 Iris configured and running for the clients.
- C. Make sure that the SSID has the authentication set to 802.1x with Cisco Centralized Key Management so the data clients can roam seamlessly.
- D. Verify the access points are spread out between the primary and secondary controller and that the controllers are in the same mobility group.

Answer: D

4. A customer has implemented a wireless network that requires tuning for High Density applications utilizing the RX-SOP feature. They are experiencing a high noise floor (average of -65 dBm) and expect that to decrease significantly. A sampling of radios determine that most Access Points have neighbors on the same channel at a power level of -75 dBm. Which value should the customer use to start tuning RX-SOP?

- A. -60 dBm
- B. -65dBm
- C. -70 dBm
- D. -75 dBm
- E. -80 dBm

Answer: C

5. A client reports that video is not streaming. The administrator determines the client is connecting at a data rate of 12 Mbps and is trying to stream to a valid multicast address on the network. What three items should the administrator check next to troubleshoot the issue? (Choose three)

- A. IGMP snooping is turned off because the client cannot request to join a group, only access points can.
- B. Video-stream for the multicast video is configured in the controller.
- C. WLAN has been set for a QoS value of Platinum.
- D. WLAN has been configured to allow multicast-direct to work correctly and multicast- direct has been enabled globally.
- E. WLAN has been set for a QoS value of Gold.
- F. RTSP is used to stream the video due to wireless multicast not using acknowledgements.

Answer: B,D,E

6. On which AP radio or radios is Cisco WGB association supported?

- A. 2.4 GHz only
- B. 2.4 or 5 GHz only
- C. 2.4, 5, or 4.9 GHz
- D. 5 GHz only

Answer: B

7. A downstream packet containing a DSCP value arrives at the WLC Ethernet interface from the wired source network. The WLC is configured for QoS WLAN 802.1p mapping. How does the WLC treat the CAPWAP QoS marking when leaving the controller interface for the respective AP and final wireless client destination?

- A. No outer CAPWAP or inner QoS tagging is applied.

- B. No outer CAPWAP QoS tag is applied, but the original DSCP is maintained inside CAPWAP.
- C. The outer CAPWAP CoS is marked and capped while the inner DSCP maintains the original marking.
- D. The outer CAPWAP DHCP is marked and capped without any inner DSCP value.

Answer: C

8. After implementing mDNS gateway, a school's network administrator notices that mDNS wireless printers are available over the whole network. Which feature can the admin use to restrict the printer mDNS advertisements to the AP that the printer is joined to and adjacent APs?

- A. mDNS-AP
- B. SSO
- C. LSS
- D. Priority MAC

Answer: A

Thank You for Trying Our Product

* 100% Pass or Money Back

All our products come with a 90-day Money Back Guarantee.

* One year free update

You can enjoy free update one year. 24x7 online support.

* Trusted by Millions

We currently serve more than 30,000,000 customers.

* Shop Securely

All transactions are protected by VeriSign!

100% Pass Your 300-365 Exam with Our Prep Materials Via below:
