

70-698 - Installing and Configuring Windows 10

<http://www.certleader.com/70-698-dumps.html>

1. Note: This question is part of a series of questions that use the same set of answer choices. Each answer choice may be used once, more than once, or not at all.

Your network contains a single Active Directory domain. The domain contains a VPN server that supports all of the VPN protocols.

You have mobile devices that run Windows 10 and have VPN connection to the VPN server.

You need to ensure that when users work remotely and Connect to the VPN, only traffic for the corporate network is sent through the VPN server.

What should you do?

- A. Click Turn on password protected sharing.
- B. Disable Network Discovery.
- C. Modify the Profile settings of an incoming firewall rule.
- D. Run the Add-VpnConnectionTriggerApplication cmdlet.
- E. Run the New-NetFirewallRule cmdlet and specify the-Direction Outbound parameter.
- F. Run the New-VpnConnection cmdlet.
- G. Run the Set-NetConnectionProfile cmdlet.
- H. Run the Set-VPNConnection cmdlet.

Answer: H

Explanation:

2. Note: This question is part of a series of questions that use the same set of answer choices. Each answer choice may be used once, more than once, or not at all.

You have a computer named Computer1 that has a virtual hard disk (VHD) named Disk1.vhdx.

You plan to configure Computer1 for dual boot from Disk1.vhdx. You need to install Windows on Disk1.vhdx by using dism.exe. What should you nm before you install Windows?

- A. Add-Windows Image
- B. bcdboot.exe
- C. bcdedit.exe
- D. bootcfg.exe

- E. bootim.exe
- F. bootsect.exe
- G. diskpart.exe
- H. Expand-Windows Image

Answer: G

Explanation:

<https://msdn.microsoft.com/en-us/windows/hardware/commercialize/manufacture/desktop/boot-to-vhd--native-boot--add-a-virtual-hard-disk-to-the-boot-menu>

3. You have a computer named Computer1 that runs Windows 10. File History is turned on.

You have files located in D:\Photos.

You need to ensure that you can recover previous versions of the files in D:\Photos. What should you do?

- A. Add D:\Photos to the Pictures library.
- B. Turn on System Protection for drive D.
- C. Enable sharing for D:\Photos.
- D. Modify the Recovery settings in the Settings app.

Answer: A

Explanation:

<https://support.microsoft.com/en-us/help/17128/windows-8-file-history>

4. Your networks contain a single Active Directory domain.

On a domain controller, an administrator creates a custom Microsoft Management Console (MMC) that uses the Active Directory Users and Computer snap-in.

The domain contains a computer named Computer1 that runs Windows 10. You use the computer to perform management tasks. You copy the custom MMC to the computer.

You need to ensure that you can use MMC and all of the features of the MMC.

What should you do on Computer1?

- A. Enable the Sideload apps developer feature.
- B. Install the Remote Server Administration Tools (RSAT).

C. Install the Microsoft Application Compatibility Toolkit (ACT).

D. Disable User Account Control (UAC).

Answer: B

Explanation:

<http://blogs.msmvps.com/acefekay/2012/08/24/delegate-active-directory-users-and-computers-aduc-then-create-a-custom-aduc-mmc/>

5. You have a computer named Computer1 that runs the 64-bit version of Windows 10 Pro.

You obtain a new driver for a device installed on Computer1. The driver is not digitally signed.

You need to test the installation of the driver on Computer1. What should you do first?

A. Run `dism.exe` and specify the `/Add-Driver` and `/Force-Unsigned` parameters.

B. From User Configuration in Group Policy, configure the Driver Installation settings.

C. Restart Computer1 by using the advanced startup options.

D. From Computer Configuration in Group Policy, configure the Driver Installation settings.

Answer: C

Explanation:

6. Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.

Start of repeated scenario

Your network contains a single Active Directory domain named `contoso.com`. All computers are members of the domain and run the 64-bit version of Windows 10 Enterprise.

On a test computer named `Computer_Test1`, you pin several company-specific applications in a group named `Contoso Apps`, and then you export the Start menu layout to a file named `Contoso.xml`.

You install Client Hyper-V on a computer named `Computer6`. You identify the following requirements:

End of repeated scenario

You need to meet the requirement of Computer6. What should you configure?

- A. NUMA spanning
- B. enhanced session mode
- C. Hyper-V Guest Service Interface
- D. RemoteFX

Answer: B

Explanation:

<https://technet.microsoft.com/en-us/windows-server-docs/compute/hyper-v/learn-more/use-local-resources-on-hyper-v-virtual-machine-with-vmconnect>

7. You have a laptop that has a high resolution display.

The Change the size of the text, apps, and other items setting is set to 175%. You install a desktop application name App1.

When you start App1, the visual elements are misaligned, and the application interface does not appear as expected.

You need to ensure that App1 is displayed properly without affecting how other applications are displayed.

What should you do?

- A. Create an AppX package for App1.
- B. Run App1 as an administrator.
- C. Modify the Compatibility settings of App1.
- D. Configure an AppLocker rule for App1.

Answer: A

Explanation:

<https://msdn.microsoft.com/en-us/library/hh454036.aspx#ImageSize>

8. In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem.

Once you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

Your network contains a single Active Directory domain named contoso.com. The domain contains two computers named Computer1 and Computer2.

A user named User1 is a member of the local Administrators group on Computer1 and Computer2.

User1 fails to access the Event Viewer logs on Computer2 from Computer1. User1 can connect to Computer2 remotely by using Computer Management.

You need to ensure that User1 can use Event Viewer on Computer1 to remotely view the Event Viewer logs on Computer2.

Solution: You run winrm quickconfig on Computer2. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

[https://msdn.microsoft.com/en-us/library/aa384372\(v=vs.85\).aspx](https://msdn.microsoft.com/en-us/library/aa384372(v=vs.85).aspx)

9. You purchase licenses for several apps from the Windows Store and you list the apps in your Windows Store for Business.

You need to tell users how to install the apps. What should you instruct the users to use?

- A. the Windows Store app and a Microsoft account
- B. a web browser and a Microsoft Azure Active Directory (Azure AD) account
- C. the Windows Store app and a Microsoft Azure Active Directory (Azure AD) account
- D. a web browser and a Microsoft account

Answer: C

Explanation:

<https://technet.microsoft.com/en-us/itpro/windows/manage/distribute-apps-from-your-private-store>

10. You install Windows 10 on a computer named Computer1. Computer1 is a member of a workgroup and will be used by multiple users to browse the Internet.

You need to ensure that a file named Policy1.docx appears on the desktop of Computer1 for all users who use the computer. The solution must minimize the number of copies of Policy1.docx.

What should you do?

- A. Copy Policy1.docx to C:\\Users\\Default\\Desktop.
- B. From a Group Policy object (GPO), modify the Desktop settings.
- C. Use a Group Policy object (GPO) to configure Folder Redirection.
- D. Copy Policy1.docx to C:\\Users\\Public\\Desktop.

Answer: D

Explanation:

<http://www.digitalcitizen.life/what-public-folder-how-use-it>

11. Your network contains a single Active Directory domain. The domain contains two computers named Computer1 and Computer2.

From Computer1, you need to view the installed devices and their associated drivers on Computer2.

What should you use?

- A. the Get-PnpDevice cmdlet
- B. the Get-WindowsDriver cmdlet
- C. the Get-OdbcDriver cmdlet
- D. the driverquery.exe command

Answer: D

Explanation:

<https://blogs.technet.microsoft.com/askperf/2011/10/21/two-minute-drill-driverquery-exe/>

Thank You for Trying Our Product

* 100% Pass or Money Back

All our products come with a 90-day Money Back Guarantee.

* One year free update

You can enjoy free update one year. 24x7 online support.

* Trusted by Millions

We currently serve more than 30,000,000 customers.

* Shop Securely
